

S/N	Name	Date	Stars	Review Title	Review Description	Sentiment
1	Turtle6796	6/17/2025	1 star	Track MyPlate	I used SuperTracker years ago and was excited to pick it back up. Unfortunately, this app only gives you weird goals and no actual consumption tracking. I would love to see an app that just does simple food group tracking again particularly for people who aren't trying to look at calories and just trying to have a balanced day.	Negative
2	fmlsa	6/10/2025	1 star	Waste of time	Took soooo much time creating logins and verifying that it isn't even worth it.	Negative
3	Good ol' Sparky	4/27/2025	1 star	Impossible	Could it be more difficult to log? Authenticate what code? Where? Why should I delete my account? I only want to track and improev my nutrition to improve my health. I don't need launch codes for nuclear armaments	Negative
4	Raqweil b	4/2/2025	1 star	Don't download the app	This absolutely sucked. It didn't save my plan, and it also wouldn't let me sign in. Every time I would go to look for the number that it sent me, it wouldn't let me do it. It just closed my progress. I do not recommend.	Negative
5	DanBx3	3/5/2025	3 stars	Not great for tracking	The strongest feature this app has is providing ideas for how to get more of each category (veggies, fruits, etc.) and suggesting how much of a thing constitutes a portion; but it doesn't allow you to log how many portions you consume. It's really just a suggestions type of app, not a tracking app.	Neutral
6	Illlady	2/26/2025	2 stars	Making an account is atrocious	Too difficult, needing to go through the DoA's website with the pressure of having a government account. If this was a resource they wanted you to use they wouldn't make it so impossible to even try out.	Negative
7	hlfvbjf	2/22/2025	5 stars	I love it	100%	Positive
8	Samurai Princess1	1/27/2025	5 stars	Easy to use	It's a motivating and fun app to use for food group tracking. Better than my fitness pal and totally free with badges and goals!	Positive
9	R6013 in SFO	11/22/2024	1 star	Pedantic	Needs KETO, PALEO, PRIMAL, CARNIVORE, and eating styles beyond the rigid USDA	Negative
10	Just me trying to lose	10/29/2024	1 star	MyPlate Simple	Hard to create an account	Negative
11	FireFreak1234	9/12/2024	3 stars	Is it any good?	This MyPlate app needs lots of work! Other wellness apps like MyFitnessPal offer much more specifically on curating meal plans, calorie tracking, and activity levels. So why use the MyPlate app? It's number 2 benefit for nutrition practitioners is the ability to quickly provide daily food group recommendations for all ages at any time...	Negative
12	Jo Detroit	9/1/2024	1 star	Zero stars for an extra confusing useless app	I'm scratching my head trying to figure out the point of this app. Literally only want to track daily calories but there doesn't seem to be a free app for that.	Neutral
13	Amyr1979	8/22/2024	3 stars	Inconvenient	Setting up the account was super annoying. Why bother with the app if it keeps redirecting me to the website? And why doesn't the daily calorie meal plan from the website appear in the app? The app doesn't take any of that into consideration. It's kind of pointless.	Negative
14	Jzzjv	8/21/2024	3 stars	Not able to keep track of daily intake	3 stars. 2 stars for calculating how much one needs and 1 for recipes. Disappointing that it's so difficult to find how to keep track of daily intake.	Negative
15	Beth SJ	8/7/2024	1 star	I cannot find portions for my age	Circular app. I keep putting in info but I don't get portions of individual food groups. It's not working properly.	Negative
16	LoF451	7/20/2024	1 star	OK app. Sketchy privacy. Tracks your web surfing!	Way intrusive. Tracks web browsing. See privacy info inside the app.	Negative
17	sarawleyxo	3/13/2024	1 star	Not very helpful, needs work!	There's a bunch of prefabricated goals but no real point to using this app. I deleted it right away as I found it pretty useless. It would be better if they overhauled it and turned it into a servings tracker instead based on quiz results. Yes, we know how to divide a plate properly, but having a calorie/serving type/size tracker, including a visual of what those sizes look like would actually be useful. It would be great to have multiple profiles to track a family and have all of that information in one place vs having to measure and if this tool behaved like it appears it would I would be great but it doesn't allow you to track what you've eaten. It doesn't allow you to change. What your goals are. It gives you challenges that you can do like eat a sweet fruit instead of candy and you can check off that goal but it's not useful for actually tracking what you're eating on a day-to-day basis feels like the design was atroc. but the product was not well thought out or executed on.	Negative
18	Jimm6378	1/22/2023	2 stars	Impossible to change values	The app offers great information on food groups, portions and ways to incorporate into daily diet. However, I think there could be more productive features in the app that help build a balanced meal plan for the day/week. It should give users the option to create a meal plan based off of the daily goals they set, as well as options to create a grocery list that accounts for the amounts of each food group needed in order to fulfill daily goals and measure current serving sizes. so if a woman needs 3 cups of fruit each day she will	Neutral
19	kuachanda	8/24/2023	3 stars	Offers great guidance but could be better	I registered a new account with login.gov only to be told. I have to link it to an existing e-authentication account. However, when I try to create an authentication account, it sends me back to login.gov I have yet access the app because of this situation.	Positive
20	Green Chemist	1y ago	1 star	Endless cycle between login.gov and authentication		Negative
21	Caren4u	1y ago	1 star	My Plate	Can't even get into the site unless I use "guest"...	Negative
22	Ebrj2	1y ago	2 stars	Subscription	Very difficult to unsubscribe.	Neutral
23	VCM67	1y ago	1 star	Can't even create an account	Don't even know if this app is good or not. I've been trying to create an account for DAYS and nothing works	Neutral
24	Loop12	1y ago	2 stars	Macros	Wish it allowed you to enter your macros, for example, 70% carbs, 15% protein, and 15% fat. Then allowed you to see daily progress towards that.	Neutral
25	NoBuenoMiAmigo	1y ago	1 star	Signing up/in	What a hassle!!! So much so I'm all set. Not worth it!	Negative
26		1y ago	1 star	People were looking for meal plans	What we wanted: Breakfast, here's three options. Lunch, based off your breakfast choice, here are your options. What the app does: Remember to eat 6.3oz of vegetables, human.	Negative
27	Meteorologist	1y ago	2 stars	ZeroPrivacyPolicy	In order to create an account, you have to give up all personal privacy. Personal info required to set up an account to sync and track goals and use tools is not protected! Not only is it available to the government but also third parties including scammers and spammers!	Negative
28	Mimi7314	1y ago	5 stars	Easy	Very simple app	Neutral
29	The Herkemers	1y ago	5 stars	My plate	It is a fun website and it teaches good nutrition in the process of setting goals and by working to accomplish them on a daily process.	Positive
30	Julie @fairytalemom	1y ago	1 star	Complicated and not helpful	After a grueling login process, the tools prove to be complicated. Not worth the time and effort.	Negative
31	TessTP2	1y ago	3 stars	Needs adult version	Good idea, but it needs partial serving ability and a way to just add a serving without qualifying what meal or color etc. and I don't need a zillion badges	Positive
32	Naturewood	1y ago	1 star	Not what I expected	This app is very disappointing. I thought it would help me track the food I was eating against the different MyPlate categories, but it doesn't. It just has generic goals such as 'snacks on vegetables' and 'have fruits with dinner'. Sure you can track these generic goals, but that doesn't help people align with the MyPlate program.	Negative
33	Meli24770	1y ago	1 star	Don't like this app	Very confusing. I don't need an app to tell me how I should eat. I'm looking for an app to help me how many calories I take in a day. I have my own dietary guidelines and plan.	Negative
34	rtomi	1y ago	1 star	Like it was designed by the government	Have mercy, this thing has way too much going on right out of the gate with no real direction or purpose. Way too complicated. All I want to do is set my daily calories and log food.	Negative
35	TexasTired	1y ago	1 star	It's an app to nowhere	Just about everything you touch on the app takes you to a website, which is not integrated to the app. And the website looks middle-school-project-built. For example, there's a table of suggested calorie plans but no column labels. So for people 14 and up, there are six column of calories. Which is mine, Marge? 1600 or 2600?	Negative
36	Do-wrong	1y ago	1 star	Junk	It's junk. It used to be great when I used it in nutrition class. Whom ever got a hold of it completely ruined it. It's lame	Negative
37	Attemptress72	1y ago	1 star	Why fix what's not broken?	The old 'MyPlate' app was much better. All I had to do was type in my food or scan a barcode on the old version. I couldn't even figure out how to track my food and calories on this new version. It only gave me a goal to eat 2 fruits and add whole grains and a dark green to my diet. This is useless!	Negative
38	Mcveida	1y ago	1 star	No way to track your food	There's no way to log your food. It is only to establish a meal plan. It falls short there too. It tells me that I should be eating 1600 calories and it doesn't allow me to change. I would gain by eating that much.	Negative
39	ltthezebra	2y ago	2 stars	You can't set your true goals	My Plate gives you very limited options for goals. For example, I can't just say that I want to eat a certain number of servings of fruits and vegetables, and a certain number of grams of protein.	Negative
40	Sunmaker1010	2y ago	1 star	App filled with everything except what counts	This app is filled with trash. All I want is a place to keep up with weight and a checklist for 'myplate' to make sure I'm eating the right amounts. This app is filled with buzzword trash goals.	Negative
41	Doc	2y ago	2 stars	Mediocre App	I don't find the goals to be helpful. Calorie and macro goals would be more helpful. In the app, there is a link to 'take myplate quiz again' and if you follow the link, complete the quiz, click 'save results', login after prompt: it takes you to 'page not found' and results are lost. I've done this twice now. Waste of time.	Negative
42	Bethie71	2y ago	1 star	No diabetic info!	I was hoping this app would help me plan diabetic friendly meals.	Negative
43	Beth196119791984	2y ago	2 stars	Unnecessary difficulty	This could be a useful app but when I use it, there is no place to store my data. I have an account but it doesn't seem to be linked to the app. It's ridiculous to have a potentially simple app but not the ability to link to an account. There may be governmental privacy reasons for this but as it is, it's useless to me. I'm willing to revisit this in the future.	Neutral
44	Bama bec	2y ago	1 star	Can't do anything on app	This app send you to the website to do everything. You don't really do anything on the app.	Negative
45	Katgiannetti	2y ago	1 star	Dissatisfied	It does not seem like the app really allows me to do anything besides set a few goals. It won't even let me log in, just keeps referring me to the website instead of the app	Negative
46	Wvio937g1b88x	2y ago	1 star	Review	This is not even helpful. It does not link your results and does not show you a daily plan of any kind.	Negative
47	alexie in nrm	2y ago	3 stars	Good start but needs fixing	How to change goals from 1 fruit or veg? Who knows! Why have a goal when you can't mark your servings? Who knows? And why does it keep sending me to a new page in browser? Who knows?	Negative
48	LadyFisc	2y ago	3 stars	Myplate	This app is very difficult to use and user friendly at all. Not able to set goals. Still working with it but the instructions in app don't seem to work in my app. I like the food categories and how much to eat.	Negative
49	Noodle dudel	2y ago	5 stars	Noodle	Great app if you can adhere to it!!!!	Positive
50	Darla2012949	2y ago	1 star	Cannot log in	I created an account on the website. Every time I try to login on the app, the app takes me to the website and back to the app to the website then back to the app. Loops. Never ending. Cannot get in. It seems to think I need to REGISTER, no matter that I already did. That's not helpful.	Negative
