	Are you currently using an app to track your diet?	No	I used an app to track my diet in the past	No	I used an app to track my diet in the past	No	
	If you found an app to track your diet that met your needs would you use it?	Yes	Maybe	Yes	Maybe	Yes	
	What is the name of the app you use (d) to collect diet information?	N/A	My Diet Coach - Weight Loss, Noom Weight Loss, Food Tracker	N/A	MyFitnessPal	N/A	
Warm-up Questions	Why are you using an app to track your diet?	Diet restrictions related to personal development (i.e. personal fitness goals)	Weight management	N/A - I rather not disclose	Diet restrictions related to personal development (i.e. personal fitness goals)	Weight management	
	Please share any additional information you'd like to share with us regarding features you would expect from a diet-tracking app?	N/A	A smart AI assistant instead of Chatbot to help answer my questions	N/A	N/A	I would expect it to cater to my BMI to help me know what nutritionally what I should be eating for my weight to reach my	
	You selected [refer to screener] as the reason you would track your diet. Please describe your experience that led you to track your diet?	I don't think I... have thought of like using an app like this but, I guess it would be... just to maintain my or improve my well-being in terms of... just health- physical health... umm... because of diet... umm... yeah, I don't know... I have not thought about using apps like this ever basically... but... I guess it's a good time to start... umm... it would only help... knowing what I'm eating and... whether or not I'm getting all sorts of nutrients... umm... that I was taught in school... hehe... yeah, just... just making sure I'm getting them... but again, it's easy to... an app can basically mislead you very easily as well... umm... so yeah, I'm skeptical how it could help... but I know what I'm looking for exactly so... uh... maybe I can... I can just use the app for that one purpose and not let other things distract me... but yeah, I... I am... not exactly sure how it can help...	I think the most important reason is that it's too complicated. Another reason is that they ask you to input your daily food intake, right? So, for example, if I'm eating a certain kind of food from a particular brand, I remember one app didn't even show that specific food as a choice. I had to estimate. And one thing that's common across all these apps is that you need to weigh your food. So, you first need to get a weighing scale, then measure the amount you're taking. For me, that's something that's doable but not consistent. When I first download an app, I'm excited and I'll do it. But after a while, with different work schedules and varying diet routines—like eating at home versus eating out with friends—I won't be able to measure consistently. Then I lose interest in the app because it's not useful; I don't find it practical, and it feels like a waste of time. I'd rather just mentally keep track of what I eat and	I would do it to see what ever I am doing is in the right way or not	I'm vegetarian and have some health conditions that made me want to eat better and have a well-rounded diet.	N/A	
	Have you heard of 'Start Simple with MyPlate' app?	Nope, just now.	No	No	I have not	no	
	If yes, what is your overall opinion of the app?						
	Path	Progress, explored the page > back to goals > badges > challenges, observes the quiz and mentions that that might help > myplate 101, explores the page > challenges > myplate quiz > completed the quiz > clicked on "save your	Goals > Fruits Goals > Back to Goals > Clicked on the 'Pick For me!' on Goals > Browsed all the tabs (Progress, Badges, Challenges, MyPlate101 > Stopped at MyPlate 101, Explores the page > Click on Fruits Food Group within the page >	Goals > Fruits Goals > Challenges > MyPlate Quiz > Completed the Quiz > Back to app	First clicked on MyPlate101 > then scrolled to the information and clicked on "Get your MyPlate plan" > She completed the MyPlate plan quiz > clicked on the calorie target portion and reviewed the plan created for her.	MyPlate101>Goals>Fruits>Back>Fruits>Back	
	Time Taken	10 mins 25 sec (from clicking on the app, going through onboarding, exploring the app, completing the quiz)	7 mins (from starting the app, figuring out what to do, and completing the quiz)	2 minutes 20 seconds	4 min 24 sec	1 minute 26 seconds	
	Success	7 mins 49 sec (actual task time)

Imagine you want to understand your current eating habits and see if they align with	Number of errors •High = Critical error •Moderate = Non-critical error •Low = Non-critical error	Low = Non-critical error	Low = Non-critical error	Low = Non-critical error	High = Critical error	Hig = Critical error	

Task 1	healthy diet guidelines. Explore the MyPlate app to see if there's any feature that can give you that kind of insight.	Observation Notes <i>Why the user was successful or not successful, e.g., wrong pathways, confusing layout, navigation issues, incorrect terminology</i>	The participant logged in as a guest because he was not intending to use the app after the test. He patiently went through the onboarding process and explored the app for a minute and then asked to get started.	The participant logged in as a guest because she wanted to learn more about the app first. After clicking through all the initial onboarding screens, she tapped on the Goals section and selected Fruits to see its contents.			
		The participant was not intuitively able to go to the correct path. He said that he didn't enter his current eating habits on the app, so he does not know how to compare that to the guidelines. He was thinking of ways to add/upload his eating habits.	Next, she explored other tabs and discovered the MyPlate 101 section. She paused to read the available information. At this point, the app prompted that she had earned a badge. She continued to click through and realized this section explained food types and recommended intake amounts.		She could find it pretty easilt, she first clicked on progress and selected last month option	She was confused after when I told her the path we were expecting was to go through challenges. She thought it was more intuitive to go through the 101 section to get an understanding of her own habits and if they fit with the guidelines.	Based off where I would put my information in I would compare to see how healthy I'm eating I see where I can put my goals in but I don't see where I could put my current eating habits in. I would go through and read about fruits and vegis and see what I'm currently eating but it doesn't allow the app to do it for me.
		He was a bit confused and took wrong pathways because of confusing layout and incorrect terminology, but eventually figured out the correct path without any help/guidance.	She then wondered if the usability task was to align with her current eating habits, it would likely involve taking the Quiz. She moved to Challenges and proceeded to complete the Quiz.				
		When he started the quiz, he wasn't sure if that was the right place to be, but halfway through the	Upon completing the Quiz, she found she wasn't				
After-Scenario Questionnaire	Overall, I am satisfied with the ease of completing the tasks in this scenario.	2	3	3	2	6	
	Why?	N/A	It is different from what I'm used to, it's not hard but it is not like a breeze.	N/A	N/A	I don't see how the app helps me coloring on the my plate 101 based off of question I	
	Overall, I am satisfied with the amount of time it took to complete the tasks in this	5	2	3	3	5	
	Why?	I just as near as I can figure it out... So... I should have spent some more time reading through all of	N/A	N/A	N/A	The app doesn't cater to the question it allows me to put projective goals it doesn't	
	Overall, I am satisfied with the support information (on-line help, messages, etc.)	3	3	3	2	Strongly Agree = 1	
	Why?	N/A	It does show me what kind of food I should be eating, and the portion amounts on the main page under the 'Goal' section. Then, in the quiz, it shows me where I stand. So, I'll give it a 3 instead of a 1. I suppose a 1 would mean I got all the	N/A	N/A	I do find that there is helpful info in each cat based on the food groups. I feel like in that aspect it does help.. Hit a goal badge didn't know what she did	
Task 2	Path Fill out the steps that the participant took to complete the task.	Progress > dropdown > past month	Progress > Drop-down > Past Month	Progress > Drop-down > Past Month	She clicked on progress > then she scrolled on the page and then selected the dropdown > she then selected last month	progress > look to see percentage if completed to check day by day. 	Observation Notes <i>Why the user was successful or not successful, e.g., wrong pathways, confusing layout, navigation issues, incorrect terminology</i>	The participant was successful in completing this task confidently. There was no confusion or any error. He understood what the task was about and promptly went to the progress page.	The participant was successful with this task. She clicked on "Progress" and commented upon seeing the screen that if she were using the app, she would expect to see data there. At this point, the app prompted her to select the number of reminders per week. She clicked on "No Thanks" first. Upon landing on the "Progress" tab, she noticed the navigation at the top that showed "This week" and immediately clicked on it to see if there was a "Last month" option. She then proceeded to read what type of data was available, such as "Average goal completed daily" (which she thought was great), "Average goal completed weekly," "Most goals completed in a week," "Best goal," and "Badges."	It was easy for the partispent to reach the goal, not many clicks and less confused	It was successful and pretty intuitive. Not too many moving parts or things that could be confused	Participant completed it successfully may have forgot about the month. However knew where to go	
After-Scenario Questionnaire	Overall, I am satisfied with the ease of completing the tasks in this scenario.	Strongly Agree = 1	Strongly Agree = 1	Strongly Agree = 1	Strongly Agree = 1	Strongly Agree = 1	
	Why?	N/A	N/A	N/A	N/A	because it was straight forward it was the option below on the lower bar. Pretty	
	Overall, I am satisfied with the amount of time it took to complete the tasks in this	Strongly Agree = 1	Strongly Agree = 1	Strongly Agree = 1	Strongly Agree = 1	Strongly Agree = 1	
	Why?	N/A	N/A	N/A	N/A	It was straight forward	
	Overall, I am satisfied with the support information (on-line help, messages, etc.)	4	3	3	2	Strongly Agree = 1	
	Why?	I did not need any, so N/A? 4? Middle ground? Don't agree or disagree.	Since I'm not actively using it, I'm giving it a 3 because I don't see any online help. There's no	N/A	N/A	I feel like it was very easy to use. I don't think there is any confusion on what option to	

Task 3	Now you have decided that you want to start improving your eating habits by increasing your protein intake. Explore the app and select objectives that will help you reach that.	Path <i>Fill out the steps that the participant took to complete the task.</i>	Goals > Protein foods> had 2 goals already from the completed myplate quiz > Edit > tried to add 2 more goals > got an error pop-up to add just 3 goals > added just 3 goals	Goals > Protein Foods> Had 1 goals pre-selected from previous add through 'Pick For Me' selection >	Clicked on goals and > protines > and selected start your day > Selected what she wants > Done	Was already on goals dashboard so clicked on protein foods > she selected "start your day with a protein food", "have protein food as a snack", and "enjoy nuts, seeds, and soy products" > she clicked done > she then started exploring the tips	Goals > Protein Foods> 3 Goals > Have a protein food with another > Have a protein food as a snack > Eat a lean Protein Today
		Time Taken	55 sec (spent more time in going through the goals and thinking which one to select)	1 min 30 seconds (Selected goals within first 30 seconds but had trouble understanding which goals are recommended for her so remaining 1 min was used to share feedback)	N/A	3 min 12 sec (spent time looking through the tips but completed the task itself pretty quickly)	49 seconds
		Success • 0 = Not completed • 1 = Completed with difficulty/help • 2 = Easily completed Number of errors • High = Critical error • Moderate = Non-critical error • Low = Non-critical error	2 = Easily completed	2 = Easily completed	2 = Easily completed	2 = Easily completed	2 = Easily completed
			Low = Non-critical error	Low = Non-critical error	2 = Easily completed	Low = Non-critical error	Low = Non-critical error
		Observation Notes <i>Why the user was successful or not successful, e.g., wrong pathways, confusing layout, navigation issues, incorrect terminology</i>	The participant was able to complete the task without any help/ guidance. Asked to repeat the question after the task to confirm whether he understood the task and completed it correctly and didn't miss anything.	The participant first selected 4 goals, but was prompted that she can only select up to 3 goals. The participant was able to complete the task, but she commented that the dashboard is confusing. Out of all the protein goals available, she wondered what should be the priority and what would be best for her to increase her protein intake. Since there are seven goal choices, she questioned whether she should start her day with a protein food, or if enjoying nuts, seeds, and soy products would be a better comparison. If the task is to increase her protein intake, she would like to know what is best, but no information is available. She felt like she was blindly picking from the seven available goals. She also commented that she has anemia, and this set of goals doesn't feel personalized for her	She could do the task not so easily but reached the goal by exploring	She was successful and the path was pretty straightforward > she wasn't sure whether when she set the goal however if it took into account she is vegetarian	Able to find it easily no issues
	After-Scenario Questionnaire	Overall, I am satisfied with the ease of completing the tasks in this scenario.	4	4	3	3	Strongly Agree = 1
		Why?	Well... I didn't quite understand the question initially... so...	If I increase my protein intake, what should I be decreasing? I can't just keep increasing protein, especially if my current intake across all three or five categories is already at three goals per category—that would be too much. For example, if I'm starting with one or two goals per category and then suddenly boost my protein to three, should I be cutting back somewhere else? Or what's the plan? This lack of clarity is really frustrating when trying to use the app.	N/A	N/A	Because I think it was clearly identified the task was to help attain a goal so I clicked on goal action specified by a food group was able to select proten food it was clear and straight forward
		Overall, I am satisfied with the amount of time it took to complete the tasks in this scenario.	3	2	3	2	Strongly Agree = 1
		Why?	N/A	N/A	N/A	N/A	It was simple clearly outlined and I was able to easily identify the task
		Overall, I am satisfied with the support information (on-line help, messages, etc.)	4	4	3	4	Strongly Agree = 1
		Why?	I did not need that again	I don't feel I'm getting much support from the information provided.	N/A	She said it would have been more helpful if she knew if took into account her dietary restrictions	I think everything was easily identified there was no room for confusion. "User Friendly"
	How was your experience using the app?		It is... uh... yeah, I can see this helping... whenever I eat something, and... have to record... umm... over time this could be very helpful in... making sure I am... doing the right things... in terms of my diet... umm... so yeah, and the app itself is... not too complicated to understand... yeah, I guess it could have been simpler in the sense... umm... yeah, there's some extra stuff like badges and stuff like that that I don't need, but I guess its of value to a lot of people so makes sense, but yeah... it seems a little cluttered and extra stuff for me... but, I am happy with this... keeping track of what I am doing day-to-day, like in the first and the second tabs here are just... just all I need probably... so yeah, I'm happy with the sub-app on the left here... Q: So the question for you is, what type of features would you like on this app so that you would like using it more?	I think it's easy to use. It's definitely not long-winded; it didn't ask a bunch of questions that I don't think are necessary. However, it could be built up better in terms of personalization. That's what I think it lacks, along with providing more information. Perhaps not pages of documentation, but maybe just a chatbot where I could ask questions like the ones I just had. For example, "If I decrease my protein food, what's the recommendation for the rest of my diet?" and so on. Clicking through everything was very easy, especially each section like Goals, Progress, Badges, and Challenges. It's very clear what's in each one. I guess the Progress section is the one I'm happiest with because it's very easy to	I like the app, its useful to make sure about what I am eating and what I am not	"It was good. The app is nice and I would like to use it to eat healthier. That's really important to me."	Overall it was easy user friendly. I think it was easy to use. Aesthetically I liked the color I think I like the layout. I feel like there was not too much info on the page. Theres more info if you want different food groups saw a pop up for a quiz it gives you incentives to keep trying to meet your goals overall I think it twas a good experience

Wrap-Up Questions	Which task was the most challenging task? Why?	Umm... Yeah, the first one of course! Hehe... Bootstrapping the app with my information, so what is my current state of things I did not ... as I said... I did not read everything too carefully... just rushed through it, but... if I have to create my account and do it right, I would...pay much more attention to it and then... yeah, the second and the third ones were definitely easier, less time consuming, but yeah, the first one- it's heavy.	The last task, because like I have mentioned, it's very hard to self diagnose what you need to increase and decrease without being helped.	Task-1, that was difficult for me to reach the end point	"The first one was confusing after you told me there are multiple quizzes. I thought the information I got was still helpful."	I would say the first task because based off the question I didn't have a right answer. I don't think the app was able to provide me with a straight forward answer.
	If you had to change one thing about using the app, what would it be?	I'd get rid of the badges... hehe... and other extra stuff... yeah, this is just a distraction... but yeah, it helps motivate I guess... it's not for me. Q: So would you appreciate if you were able to personalize the app according to your interests? A: Oh yeah yeah yeah! Definitely! Something like I guess... umm... I forget there was another app that I was using where I can decide how it looks... umm... yeah, I forgot... it was sometime back... but yeah, it's not a part of my daily routine so I don't really know, but I can... for exapmple, just getting rid of the badges here, challengesand just getting rid of the stuff, just keeping the list... and yeah, making it easier to... easier on the eyes... like just this view and nothing else.	I guess the "MyPlate 101" section, that section is at the very end of the choices. I mean on the navigation bar. But when I first downloaded the app, I was a bit confused about what exactly I needed to do. It's because the first section already starts with "Goals," and then I wondered, "How am I going to set a goal?" So, I think that's my main issue with the app. Even if there had been a pop-up telling me to go to "MyPlate 101" and read through that section first, it wasn't clear. I had to figure it out myself because this app is different from what I'm used to.	The app is very crowded, I would make it less crowded so it becomes easy for a user to use and looks good	"I would like a spot to mark that I'm vegetarian and see that show up on the app."	I don't see any recipes I think recipes would be helful maybe more pictures as well
	What was your overall opinion with the app after the usability test?	It... is... yeah, it has good... umm... it has very good potential of being integrated into an overall wellness plan... umm... it... it would certainly help a lot of people who have like certain health conditions and stuff like that... to make it very streamlined for them to track their food intake and... stuff like that... so...umm... I'm glad something like this is out there. For me personally, this would... I'd like to just experiment for a week or a month... and see if it actually... keeps me within my... umm... within what I actually need in general in my food, so I can't say much without using it for atleast a week I guess, but yeah, I can see the potential it's... pretty helpful... definitely... only a few apps are... as helpful as this.	I think it's a good start, but it's definitely not well-developed in terms of personalization, as I keep saying. I believe a healthy diet or health-focused app should be personalized instead of general. While MyPlate provides information about what your age or weight means for intake, it's not so personalized that I feel truly taken care of.	It was nice, I did not know about this app s	"I thought it was nice! I'm excited to see how you guys update it and make it better."	For me I think I like it I think it is clear concise if I'm using an app Id like it to be straight forward simple nothing overwhelming espially when it comes to food or diet making it easy and simple and pretty straight forward to follow it you'll get more people to use it the badges is an incenive to get people to use it I like it.
	Please complete the questionnaire to calculate the System Usability Scale (SUS) score.	77.5	55	72.5	70	97.5
